**ALL INSTALLATIONS
MUST COMPLY WITH
AS/NZS3500**

GENERAL INFORMATION

MAINTENANCE

- Clean regularly using mild soap and dry with a soft cloth. • Do not use abrasive cleaners, harsh detergents or citrus based cleaners on any products as these will scratch the surface. • Tightening or adjustment of Tapware over time is considered general maintenance. • Failure to clean/replace aerators/flow restrictors as required will void warranty. • Damage to finishes that arise from installation or post installation will void warranty.

The warranty will not apply if:

- The product has been damaged by improper use; • The product has not been used in accordance with any applicable instruction guide; • The purchaser has attempted to modify or repair the product; • The purchaser has failed to observe the cleaning and maintenance guidelines; • The product is not installed by a licenced Plumber. • Flow controllers/ aerators not regularly cleaned/ replaced.

Product warranties are personal to the person who acquires the product for their own consumption or use and not for resale or resupply. Claims with this product cannot be made by anyone other than the consumer. Where a product is covered by parts and labour warranty, the warranty covers both the repair of the defective part or the provision of a spare part to replace the defective part and the installation of that part. Where a product is covered by parts only, the warranty covers both the repair of the defective part or the provision of a spare part in replacement. It does not include the removal of the defective part or the installations of the repaired or replaced part. We reserve the right to provide minor components (e.g. handles, aerators, hoses, dress rings and washers) as 'Parts Only' to the customer. Casa Lusso reserves the right to alter, or amend this warranty offer in writing at any time.

IMPORTANT

IT IS IMPORTANT TO FLUSH OUT THE WATER PIPES BEFORE INSTALLING THE MIXER.

- Hot and cold water inlet pressures should be equal.
- Inlet pressure range: 150 – 500 kPa
- New Regulation:
500 kPa maximum operating pressure at any outlet within a building. (Ref. AS/NZS 3500)
- Maximum hot water temperature: 80°C.

CONTENTS

FAILURE TO COMPLY WITH ANY OF THE ABOVE INSTRUCTIONS WILL VOID ALL WARRANTIES

BEFORE STARTING

- For Retrofit installations where Jumper valves have previously been installed within 10mm of finished tiles a Trouble dome may be installed.
- Install the Spindles hand-tight until the seal of the Spindle firmly makes contact with the seat.
- Using an appropriate spanner tighten the Spindle another 1/8th of a turn. Do not over-tighten.
- Over-tightening the Spindles could damage the ceramic discs and in turn, void the manufacturer's warranty.
- Place the Fibre washer over the seated Spindle and fit the Spindle Locknut.

1

2

3

Cut-off gauge must be tightened to Spindle Lock Flange. Spindle Lock Flange must be tightened to finished wall surface.

4

5

Remove cut-off gauge and deburr inside of locknut after cutting.

6

Set screw engagement slot to be positioned on underside.

7

Screw the adapter screw into the Spindle handle adapter, then place the handle on top.

8

Position handle 2-3mm from finished wall and screw set screw into slot of Spindle handle adapter.
