

ROCHER Granite Sinks

Product Care

General Wear and Tear will occur overtime during the life of the sink with continuous everyday use. To prolong the surface finish, please ensure these care and cleaning steps are adhered to. Failing to follow these steps will void all warranties.

- Product must be installed by a licenced Tradesperson.
- Clean regularly using a soft cloth with a mild liquid detergent and warm water.
- Coating the sink in olive oil after cleaning will help to preserve the finish.
- Do not use cream cleaners, bleach or any cleaning products or agents containing acid, e.g muriatic. These are abrasive and using these may damage the sink and will void warranty.
- Do not use scrubbing brushes or cleaning pads with hard and rough surfaces as these will scratch the product.
- Do not leave sink full with water over a long period of time. Ensure its drained after each use.
- We recommend using a separate container for soaking. This helps minimise prolonged exposure to chemicals and cleaning agents, helping preserve the sink's finish and appearance.
